En esta ocasión analizamos un Software de Backup para XenServer realmente muy interesantes, todo ello ha sido debido a un post que hemos recibido en el Foro (puedes acceder a los comentarios <u>pulsando aquí</u>), de algunas herramientas de este tipo, este procedimiento realiza una breve mirada a Alike de Quorumsoft, una herramienta a nuestro entender muy interesante y con ciertas funcionalidades muy a tener en cuenta.

Alike es un software de Backup para plataforma XenServer. En este breve artículo vamos a ver algunas de las funcionalidades de este software, sencillo y fácil de utilizar. Alike permite deduplicación y compresión, backups de manera fácil mediante un gestor de tareas, retención de larga duración de históricos, backups seguros con encriptación y recuperación rápida y segura de los backups.

Los requerimientos que vamos a necesitar son los siguientes:

- Windows Server 2003
- Windows Server 2008
- Windows 2000 (no testeado, pero probablemente funciona)
- Windows XP
- Windows Vista

#### **Características**

Feature	Description		
Data Deduplication	Performs block-level data deduplication across all	VMs backed up	
Friendly UI	This easy-to-use User Interface will get you backing	g up quickly	
XenServer Integration	Leverages XenServer snapshots to capture guest \	/M state. XenServer 5.5	or later is rec
Pool Support	Is pool-aware and can back up guests deployed to	a XenServer storage p	ool
Quiesce Support	Quiesced snapshots are supported in XenServer 5	.5	
Supported Storage Repositories (SRs)	Alike Supports any SR in XenServer 5.5		
Point-in-time restore	Versions each snapshot that is backed up		
Syslog integration	Logging can be sent to a syslog server email/pagin	g notifications	
Flexible Scheduling	Jobs can be scheduled daily, weekly, or monthly; m	ay be configured for m	ultiple runs pe
64-bit Support	Alike can run on 64-bit Windows, can back up any g	uest OS, and can also	connect to a >
Backup Storage Support	CIFS/ISCSI/Local Disk		
Automated Storage Coalesce	Alike can fully automate and schedule Citrix's Coale	esce tool, dramatically	simplifying the
Edicionae Dienonihlae		Alike Free	Alike
Maximum Number of Protected YanSan	er Hosts	1	One Per Lice

Maximum Number of Protected XenServer Hosts	1	One Per Lic
Maximum Supported Guest VMs per XenServer Host	Unlimited	Unlimited
Maximum Archived Versions of Each Guest VM	3	Unlimited
Maximum Number of Scheduled Jobs	3	Unlimited

Price
