En esta ocasión mostramos el procedimiento de instalación y configuración de Merchadasing Server, a partir de la importación de la VM que Citrix pone a disposición.

Que es Mechandasing Server?

Citrix Merchandising Server y Citrix Receiver para Windows trabajan conjuntamente para optimizar la instalación y la administración de la distribución de aplicaciones en los escritorios de los usuarios. Merchandising Server proporciona la interfaz administrativa para configurar, distribuir y actualizar los plug-ins para los equipos de los usuarios.

Delivery Center Service Architecture

How To: Set Up SSL Certificates in Merchandising Server

Welcome to the Citrix Merchandising Server Administrator Console There are a few quick steps you will need to complete to begin to deliver Citrix plug-ins and updates.

Click the links below to complete these steps. You can come back to this list any time by clicking the Set Up Guide link in the left navigation pane.

1. Set Permissions

Give users permission to use the Administrator Console.

2. Set Options

This is the location in which general delivery options are set. These are the default settings for every delivery, but can be overridden if desired.

3. Download Plug-ins

Download plug-ins from the Citrix Update Service onto this Merchandising Server.

Create Rules

Rules are used to define which user or computer receives a delivery. You must create at least one rule before you can deliver any plugins.

5. Schedule a Delivery

You are now ready to schedule a plug-in delivery. You must include at least one rule and one plug-in in every delivery.
